Project Investigative Questions

As we had the chance to be more familiar with our dataset, we evolved our questions to the 3 general exploratory questions as follows:

Question 1: Effect of Age on Employment, GDP and GDP per capita

Question 2: Effect of Education Level on Employment, GDP and GDP per capita

Question 3: Effect of Enterprise Size on Employment, GDP and GDP per capita

In our analysis, we explore how the three factors of age, education level and enterprise size influence the GDP, GDP per capita and employment.
